

Inorganic Nomenclature Quiz

© Michael Harwood 2025

Name: Frank Moore

Number of Questions: 5

Score: 40%

Score = [#correct (without help) + $\frac{1}{2}$ #correct (needed help)] $\div$ number of questions

Question Type: Ionic

(+) Multivalent Ions

(-) Derivative Polyatomic Ions

H+ Polyatomic Ions

Other Polyatomic Ions

Answer Type:

Names to Formulas

Questions Correct: 3

1. tin(IV) hydrogen sulfide = $\text{Sn}(\text{HS})_4$ *
2. nickel(II) permanganate = $\text{Ni}(\text{MnO}_4)_2$ *
3. mercury(II) hydrogen carbonate = $\text{Hg}(\text{HCO}_3)_2$

* indicates that help was needed to answer the question

Questions Incorrect: 2

1. nickel(II) hypochlorite = $\text{Ni}(\text{ClO})_2$
2. platinum(II) thiosulfate = PtS_2O_3
